IMPORTANT NOTICE REGARDING IMPROVEMENTS TO YOUR BENEFIT PLAN

October 2023

To All Active Participants and Pre-Medicare Retiree Participants of the Five Rivers Carpenters District Council Health & Welfare Fund (the Plan):

Beginning January 1, 2024, the Fund will cover Continuous Glucose Monitors and Automated Insulin Delivery Systems when provided through the Fund's Pharmacy Benefits Manager SavRx.

Continuous Glucose Monitors are diabetic testing machines that automatically track blood glucose levels through a sensor attached to the skin that sends real-time readings to either the reader device or your personal smartphone. Depending on the CGM model, alarms, and notifications along with potential insulin pump synchronization are available.

Automated Insulin Delivery Systems are diabetic insulin supply machines that connect to a Continuous Glucose Monitors or your smartphone to automatically deliver insulin on demand. These automated systems can adhere directly to the skin for up to several days, eliminating the traditional needle-delivery methods.

Both the Continuous Glucose Monitors and Automated Insulin Delivery Systems will be available at normal coinsurance amounts and must be preauthorized by SavRx. Please contact SavRx at (800) 228-3108 or at <https://app.savrx.com/login> to learn more and see if you qualify.
